

Day1 Speech log

Player1
seer

P2 shifted blame after P6 died, that's a wolf move. **I suspect P2.**

Player2
werewolf

P1 stayed quiet yesterday and suddenly points at me. That's a wolf move. **I suspect P1.**

Player3
werewolf

I agree with P2. P1 barely spoke yesterday and now aggressively targets P2.

Player4
villager

Player2
werewolf

How should I speech and act?

Incorrect reasoning

P2 and P3 both suspect P1, so **P1 is suspicious.**

ours

Relational Belief

P1:unknown, P2:werewolf, P3:werewolf, ...

P2's quick counter and P3's support suggest **P2-P3 wolf relation.**

Reasoning-to-decision gap

P2 and P3 both suspect P1, so **P1 is suspicious.**

I'll vote for P3.

ours

P2:werewolf, P3:werewolf,

P2's counter and P3's support suggest **P2-P3 wolf relation.**

I'll vote for P3.

Strategically weak speech

I should do a speech that I can look like a seer.

I'm the real seer, and I killed a man last night.

before

P2: werewolf

after

That's only possible for werewolf.
P2: werewolf

ours

I should do a speech that I can look like a seer.

I'm the real seer, and I checked P4 is not werewolf.

before

P2: werewolf

after

P2's speech seems reasonable.
P2: seer!
